## Senior Test Manager for Order to Cash Process Re-Implementation Project

Test & QA

Transportation / Logistics

#218750

Start date: ASAP  
Duration: 7-9 months  
Language: Danish/Native or bilingual  
Seniority: Senior

### Introduction & Summary:

The role of the Senior Test Manager is crucial for the re-implementation of the Order to Cash process across multiple systems. The successful candidate will possess significant experience in test execution and documentation, coupled with excellent stakeholder management skills. A strong background in SAP integrations and a thorough understanding of Order to Cash processes will enhance the effectiveness of the project.

### Main Responsibilities:

Manage and facilitate all stages of testing, ensuring quality and progress across the project.

- Establish and implement test strategy and plans.
- Monitor test progress and report on test execution.
- Coordinate clarification and drive related tasks within the team.
- Assist with cut-over management during go-live.
- Manage stakeholder relationships concerning test activities.
- Support project management on contract management with external vendors.

### Key Requirements:

- Experience with test execution and documentation across multiple systems.
- Relevant certification such as ISTQB.
- Strong collaboration and stakeholder management skills.
- Knowledge of SAP, system setup, and integrations.
- Experience with Order to Cash processes.
- Vendor/contract management experience related to testing.
- Experience in test strategy and execution.
- Danish-speaking proficiency.

### Nice to Have:

- Experience with cut-over management and go-live verification.
- Project management or track lead experience.

### Other Details:

Consultants are required to work on-site a minimum of three days per week, with flexibility for remote work. The estimated start date for this assignment is January 5, 2026, and it is expected to last until March 1, 2027.
