● PROFILE

Michael Krogh is a IT Project Manager with high technical understanding and a special knack for infrastructure and communication related projects and initiatives. He has successfully delivered a significant number of projects to customers within a variety of businesses, including manufacturing, education, communications and the public sector. Successful projects in Michael's portfolio include organizational changes, datacenter implementations, cloud solutions, telepresence, communication setups, transition management and much more.

Michael has significant experience with vendor management and the coordination of complex internal and external deliveries to reach a target. He is known for an excellent combination of high energy and high level of focus as well as a highly efficient stakeholder management on all levels of the organization. He is a great communicator and facilitator, and he possesses a very likeable nature and a natural mindset for engaging leadership that makes it a pleasure for colleagues to overcome challenges and reach goals.

● EMPLOYMENT HISTORY
